

HOME ENERGY MAKEOVER WORKSHOP & EXPO

Home Energy Makeover Workshop & Expo

at Fort Lewis College, Durango, CO
Saturday, August 16, 2008

Attend your choice of 25 information-packed sessions about energy efficiency, water conservation, green energy, and much, much more. Plus, see displays of state-of-the-art technology available locally to help you save money, use energy smarter, and make your home more comfortable and safe.

Thank you to our Hosts

La Plata Electric Association provides its members safe, reliable electricity at the lowest reasonable cost while being environmentally responsible. About 4,000 of La Plata's 30,000 members have signed up for its WattWatcher® Time-of-Use rates and save between 5 percent and 50 percent over the standard residential rate. La Plata also offers energy efficiency credits for installation of electric space and water heating systems on its WattWatcher rates, and stocks water heaters for member pick-up. www.lpea.com

Empire Electric Association is a non-profit, member owned rural electric Cooperative. We provide electric power to residential, commercial and industrial customers in southwest Colorado and southeast Utah. We are currently serving more than 15,000 customers over 1,869 miles of energized line in a 3,500 square mile service territory. www.eea.coop

Tri-State Generation and Transmission Association is a wholesale electric power supplier owned by the 44 electric cooperatives it serves. Tri-State generates and transports electricity to its member systems throughout a 250,000 square-mile territory across Colorado, Nebraska, New Mexico and Wyoming. www.tristategt.org

Colorado Rural Electric Association is the statewide trade association representing Colorado's electric cooperatives. CREA's membership is composed of all of the state's 22 electric distribution cooperative associations and one generation and transmission cooperative. www.coloradorea.org

Colorado Association of Municipal Utilities (CAMU) is a non-profit organization that represents the 32 cities and towns throughout Colorado that own and operate their own electric and natural gas systems. CAMU is a source for legislative representation, training and information for its members. There are 29 municipal electric systems and seven municipal gas systems operating within the state of Colorado. In combination these municipal utilities serve a population base of approximately 815,000 Colorado residents. <http://coloradopublicpower.org>
